

Samples	<u>Solve inequality</u>
----------------	--------------------------------

1. Solve $x - 3 < 5x - 19$, then write your answer in interval format and mark it on a real line.
2. Solve $2x - 3 \leq 5x + 6$, then write your answer in interval format and mark it on a real line.
3. Solve $7x - 1 \geq 6x - 7$, then write your answer in interval format and mark it on a real line.
4. Solve $2x + 3 < 3x - 1$, then write your answer in interval format and mark it on a real line.
5. Solve $-8x + 3 < -6x - 3$, then write your answer in interval format and mark it on a real line.
